Definitions

Single Bromeliad: Any standard, non-decorative pot (or mount); containing one mature or near mature bromeliad. May include only immature offsets that are too small for removal from the mother plant; determined by Classification at time of entry.

Multiple: Any standard, non-decorative pot (or mount) containing two or more mature or near mature bromeliads (with or without offsets) all of which are naturally interconnected by an intact rhizome. Blooming: Must have flower (i.e. petals) or mature unopen buds evident. If a multiple at least one plant must have a flower (i.e. petals) or *mature* unopened buds evident.

Non Blooming: No inflorescence. Very immature inflorescence permitted but will be judged accordingly. May include immature offsets too small for removal.

Horticultural Display: May be started from one or more bromeliads from the same or different genera, species, varieties, forms, hybrids or cultivars and allowed to grow and multiply in a natural fashion with emphasis on horticultural excellence.
